CONTENTS

March

Papers

The analytical design of bituminous pavements. S. F. Brown, J. M. Brunton and A. F. Stock. Paper 8834	1
Residential currents in Port Talbot Harbour: a mathematical model study. R. A. Falconer. Paper 8836	33
Model studies on multi-cell structures. N. E. Shanmugam and T. Balendra. Paper 8847	55
Hydraulic forces on rails for vertical lift, high head gates. D. G. Wardle and D. A. Crow. Paper 8849	73
The hydraulic roughness of slimed sewers. J. A. Perkins and I. M. Gardiner. Paper 8850	87
Free vibrations of outrigger-braced structures. F. R. Moudarres and A. Coull. Paper 8852	105
Analysis of shear-wall and shear-core assembly subjected to lateral and torsional loading. Duen Ho and Chi Ho Liu. Paper 8881	119
Application of the British Code for Practice on Wind Loading in areas subject to typhoon winds. L. C. H. Lam and R. P. Lam. Paper 8884	135
A study of twenty-five year old pulverized fuel ash concrete used in foundation structures. J. G. Cabrera and G. R. Woolley. Paper 8885	149

Technical notes

Field and buckling strength of T, Y and X joints in rectangular hollow section trusses. J. Szlendak and J. Brodka. TN 397	167
Shear stress distribution in masonry elements. M. A. Rouf and F. Sawko. TN 425	181
Extension of the S-curve method of unit hydrograph transformation. D. W. Reed. TN 439	193
Simulation of channel steepening in the Marala-Ravi Link Canal. K. V. H. Smith and S. Kaewyen. TN 440	203

Discussion

Full-range response of uniformly loaded clamped circular steel plates: comparisons between theory and experiment. G. T. Lim and G. J. Turvey. Paper 8759	211
A simple explicit formula for the estimation of pipe friction factor. J. J. J. Chen. TN 400	215
Investigations of the engineering properties of OPC/pulverized fuel ash concrete: strength development and maturity. R. K. Dhir, J. G. L. Munday and L. T. Ong. TN 404	223
The effects of shear deformations on the shear centre of open-section thin walled beams. B. Stafford Smith and A. Abate. TN 405	227

June

Papers

A note on the determination of vertical turbulent transport coefficients in a partially mixed estuary. J. R. West, D. W. Knight and K. Shiono. Paper 8812	235
Elastic settlement of a transversely isotropic continuum with surface loading over a polygonal region. J. A. Hooper. Paper 8844	247
Ships in restricted waters (critical conditions). D. Haslewood. Paper 8846	275
The failure of brick masonry under biaxial stresses. M. Dhanasekar, A. W. Page and P. W. Kleeman. Paper 8871	295

VOLUME CONTENTS—PART 2

Shear strength of concrete beams in hogging regions. L. A. Clark and P. Thorogood. Paper 8874	315
The use of aerial photography and image processing to measure dye dispersion from a long sea outfall. W. B. Wilkinson and P. J. Curran. Paper 8882	327
The fatigue strength of stud shear connections in composite beams. D. J. Oehlers and L. Foley. Paper 8890	349
Buckling behaviour under pressure of cylindrical shells reinforced by light ring stiffeners. S. K. Tsang and J. E. Harding. Paper 8891	36

Technical notes

Systematic explicit solutions of the Prandtl and Colebrook-White equations for pipe flow. J. J. J. Chen. TN 431	383
The effect of sinusoidal vertical gusts on the subcritical galloping of a rectangular cylinder. A. S. White and C. T. Tiew. TN 432	391
The analysis of steel orthotropic deck plates in the non-elastic state. Z. Mańko. TN 444	401
The Nail-Web beam. B. O. Hilson and P. D. Rodd. TN 451	415

Discussion

The influence of initial gaps on infilled frame behaviour. J. D. Riddington. Paper 8767	427
Dynamic response of dams and other structures to differential ground motions. A. A. Dumanoglu and R. T. Severn. Paper 8783	429
Production analysis applied to work improvement. J. R. Broomfield, A. D. Price and F. C. Harris. TN 415	431

September

Papers

Design and construction of a model prestressed concrete bifurcated box girder bridge. S. H. Perry, P. Waldron and M. W. Pinkney. Paper 8899	439
Elastic analysis and experimental behaviour to collapse of a 1:12 scale prestressed concrete bifurcated bridge. M. W. Pinkney, S. H. Perry and P. Waldron. Paper 8900	455
Progressive gate-modelling for studies of flow-induced vibration. J. D. Hardwick. Paper 8901	483
The finite element analysis of arch dams in wide valleys, including the effect of crack formation at the concrete-rock interface. J. P. F. O'Connor. Paper 8906	511
Web post strength in castellated steel beams. T. Okubo and D. A. Nethercot. Paper 8909	533
Flexural shear failure of reinforced concrete slab bridges. R. J. Cope. Paper 8934	559
A study of the early hydration of Portland cement. W. J. McCarter and A. B. Afshar. Paper 8954	585

Technical note

Bursting stresses due to prestressing tendons in curved ducts. A. McLeish. TN 441	605
---	-----

December

Papers

Evaluation of centres of resistance in multistorey building structures. B. Stafford Smith and S. Vezina. Paper 8905	62
Numerical modelling of storm surges in the Clyde Sea Area. J. M. Townson and A. S. Donald. Paper 8916	63

VOLUME CONTENTS—PART 2

The punching resistance of prestressed concrete slabs. P. E. Regan. Paper 8930 . . .	657
Collapse of concrete U-beam half joints: theory and model studies. B. S. Gill and L. A. Clark	681
The Venturi as a saline intrusion control for sea outfalls. J. A. Charlton. Paper 8980 .	697

Technical notes

Angularity of aggregate particles as a measure of their shape and hydraulic resistance. R. D. Gupta. TN 438	705
Strengthening of T moment of RHS joints. J. Szlendak and J. Brodka. TN 443 . . .	717
Circular plate on a non-linear elastic foundation. A. Hassan and M. Nassar. TN 447 .	729
Torsion-bending analysis made easy. J. M. Davies. TN 454	737

Discussion

The prediction of mean annual flood in Northern Ireland. J. E. Hanna and D. N. Wilcock. Paper 8806	749
Hydraulic forces on rails for vertical lift, high head gates. D. G. Wardle and D. A. Crow. Paper 8849	753
Application of the British Code of Practice on Wind Loading in areas subject to typhoon winds. L. C. H. Lam and R. P. Lam. Paper 8884	759
Hydraulic design of roof gutters. R. W. P. May. TN 420	767

Addendum

The Flowcage—laboratory tests of a novel renewable energy device for flowing water. W. R. Dickens. TN 414	769
---	-----
